# SHIMMEN AUSDISTANZIEREN SHIMMING

[www.mokix.com](http://www.mokix.com)

## V-Snaar Shimmen

Waarom shimmen?

Niet alle merken V-Snaren en variateurs hebben een gelijke maatvoering als de originele V-Snaar of variateur.

Na het vervangen van een V-Snaar of variateur is het van belang te controleren of de V-Snaar gelijk ligt met de buitenkant van de glijbus.

De eventuele ontstaande afwijking zijn te corrigeren door het plaatsen van shim's.

Een juiste afstelling voorkomt het stuk gaan van de V-Snaar of snelle slijtage.

## Antriebsriemen ausdistanzieren

Warum ausdistanzieren?

Nicht alle Markenriemen und Variatoren haben die exakt gleiche Masshaltigkeit wie das Originalteil.

Nach dem erneuern eines Riemens oder Variators ist es deshalb wichtig zu kontrollieren, ob der Antriebsriemen buendig mit der Gleitbuchse abschliesst.

Die eventuell entstandenen Abweichungen sind mit dem Einsetzen von Distanzscheiben zu korrigieren.

Eine korrekte Einstellung verhindert schnellen Verschleiss oder sogar die Zerstörung des Riemens.

## V-Belt Shimming

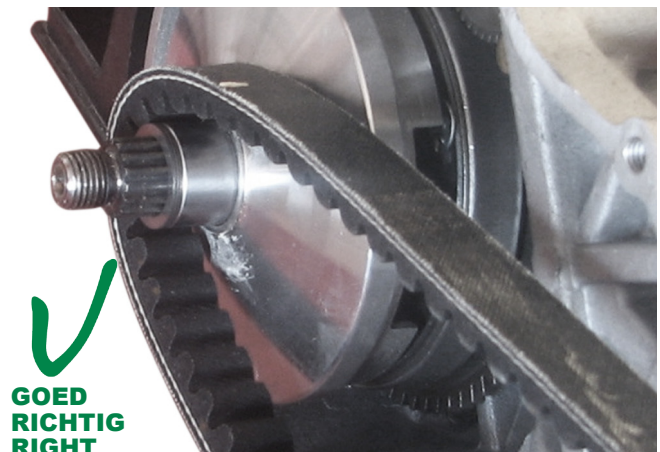

Why Shimming?

Not all the V-belts and variator brands do have measurements that's equal to the original V-belts or variator.

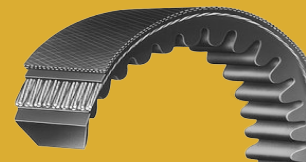

After replacing a V-belts or variator it is important to check if the V-Belt is aligned with the outside of the Variator-coil.

If there is space between the belt and coil, you can correct it by placing shims.

A correct adjustment avoids the breaking and quick wear and tear of the belt.
