

Motorcycle MP3

(Rearview Mirror Loudspeaker)

Instructions

C. Using Methods (there are two methods for turning on the machine)

1. Playing Songs; turn on the power switch, when the power indicator light is bright, then insert the SD card. U-Disk or connect to Line in (headphone input) to play songs. When playing, press the (M) key for the next song; the (M) key for the previous song. Long-press the (M) key to increase the volume; the (M) key to reduce. Suspension of songs by the (M) key.

2. Receiving radio: turn on the power switch, and press (M) key to receive the radio. Long-press (M) key for 4 seconds, it will switch to auto search the radio. After searching, it will automatically save the radio and return to the first channel that it searched. When playing, select the next channel by (M) key; return to the last channel by (M) key. Long-press the (M) key to increase the volume; the (M) key to reduce. Suspension of songs by the (M) key.

3. When playing, the U disk, SD card, Line in, and FM radio can be switched with each other by (M) key. When the machine is connected to all the above equipments, it will first play the songs of "Line in". When it isn't connected to the "Line in", it will first play the last connecting equipment.

Note: our products(TW-101 and TW-201) can't be played with U disk and Line in function.

Preface

Dear customers,

Thank you for purchasing our product.

This product is an integrated design of MP3 player and rear-view mirror, with fashionable appearance and easy installation, it can be used directly instead of the original rear-view mirror. Wherever on the road, waiting, recreation, outings and activities, it always gives us a lot of fun. It doesn't only enrich people's lives, but also meet the needs of many musical lovers. Before you use this product, please read this manual carefully, which will tell you the product's features and installing methods, so that you will use it more easily and conveniently.

Notes:

1. We strongly recommend that your important data in the SD card must have the backup. If the data is lost by this product, we will not assume any responsibility.

2. Please don't use the mirror loudspeaker in the thunderstorm. Otherwise, it is likely to cause the loudspeaker breakdown or lightning strike.

3. When the product is breakdown, please contact our local franchiser. Don't repair it by yourself. Otherwise, we will not be able to provide you with a normal after-sales service.

D. Resolving the faults

Symptom of failure	Solutions
