

INSTRUCTION RETURN PACKAGE

New parts must be delivered to us undamaged, unwritten, unlabelled, unassembled, in new condition and in original packaging.

If this is not the case, we cannot take it back as new and the costs incurred for, among other things, repacking will be charged to you.

Return shipments must therefore always be properly packaged in an **OVERBOX**, not in the original supplier's packaging, to prevent damage(s) and the product remains resale worthy!
